

Clouds & Particles

More

1. What happens in clouds?

Solution Worksheet 2

1.

1. Cumulonimbus
2. Cirrus
3. Altocumulus
4. Stratus

2.

Aerosols can come from *oceans*, from *deserts* or from *living organisms*. They may act as *cloud condensation nuclei* so that *droplets* can form, eventually making up a *cloud*.
